

## Health and Safety Recommendations (EN/BS 998.1) for Mono St Astier Premixed Coloured Mortar

See Also: [Mono St Astier Data Sheet](#)

### Product and Manufacturer Identification

- **Product:** *Ready mixed mortar in 30 kg. bags*  
**Commercial Name:** *Mono Saint Astier*
- **Manufacturer:**  
**Name:** *Dordognaise (C.E.S.A. Group)*  
**Adresse:** 24110 St Astier, France  
**Tel:** 05 33 54 1125  
**Fax:** 05 33 04 6791
- **In case of Urgency:**  
**France:** - ORFILA, Tel : 01 45 42 5959  
**UK:** – The Lime Line 0800.783901  
**Ireland:**– The Traditional Lime Co. 05991 51750

### Components

- Mono St. Astier is a ready mixed mortar based on natural hydraulic lime, cement, siliceous and calcareous sand, additives and pigments.

### IDENTIFICATION OF DANGERS

- Mono St. Astier is not classified as a « dangerous product » as defined in annex VI of the EU directive 67 / 548. However, because of its alkaline properties in solution, some handling precautions are necessary.

Risk symbol	Principal risks for people and the environment
<b>X<sub>i</sub></b>	<ul style="list-style-type: none"><li>• Mono St. Astier irritant for eyes, respiratory track and mucous membranes.</li><li>• Risk of severe eye damage in cases of splashes of powder or wet mortar in the eyes.</li><li>• Once hydrated, Mono St. Astier increases alkalinity and therefore can irritate or dry the skin.</li><li>• In cases of significant ingestion Mono St. Astier is caustic for the digestive tract. It can cause burning of the mouth, esophagus and stomach.</li><li>• Mono St. Astier does not present particular risks for the environment subject to the recommendations in section XIII and the respect of national or local disposal directives.</li></ul>

<b>Cleaning and recovery methods</b>	<ul style="list-style-type: none"><li>• Use preferably collecting methods so as to avoid the creation of dust in the air</li></ul> <p><b>NOTE:</b> After collection, Mono St. Astier can be disposed as normal building waste. Monocromex hardens approximately 60 to 90 minutes after mixing with water.</p>

## USAGE, STOCKING AND HANDLING PRECAUTIONS

STOCKING	USAGE	HANDLING
<ul style="list-style-type: none"> <li>Keep away from the reach of children</li> </ul>	<ul style="list-style-type: none"> <li>Avoid creating airborne dust. If unavoidable, wear an anti dust mask.</li> <li>Avoid direct contact of Mono St. Astier with eyes, skin and mucous membranes.</li> <li>Wearing security glasses is recommended.</li> </ul>	<ul style="list-style-type: none"> <li>The handling of Mono St. Astier bags has to be done in such a way as to avoid the creation of airborne dust.</li> <li>Handle mono St. Astier in accordance with local health and safety directives.</li> </ul>

## CONTROL PROCEDURES FOR WORKERS' EXPOSURE AND TYPE OF EQUIPMENT FOR INDIVIDUALS' PROTECTION

### Exposure control:

#### Exposure limits

<b>Total Dust:</b>	10 mg/m <sup>3</sup>
<b>Cellular dust:</b>	5 mg/m <sup>3</sup>

### Individuals' protection:

<b>Respiratory protection:</b>	In the presence of airborne dust, the use of an anti dust mask is recommended.
<b>Hands protection:</b>	Wear adequate gloves
<b>Eyes protection:</b>	Wear protective goggles in case of airborne dust or risk of splashes of powder or wet mortar.
<b>Skin protection:</b>	Wear adequate work clothing covering the arms and extend it to the hands by wearing gloves. If working standing on knees, wear knee pads. Skin protective creams can also be used.

## PHYSICAL AND CHEMICAL PROPERTIES

Colour	Grey powder
Odor:	None
PH in water solution:	Alcaline between 12 and 13
Fusion temperature:	> 1000°C
Apparent volumetric mass:	1,35 g/cm <sup>3</sup> at 20°C
Explosion point:	Not applicable
Flammable point:	Not applicable
Danger of explosion:	None
Granulometry	20 to 30 % of fines < 80 μ

## STABILITY AND REACTIVITY

Stability:	The product is stable
Conditions to avoid:	Humidity can cause hardening of the product
Materials to avoid:	None
Dangerous decomposition products :	None

## TOXICOLOGICAL INFORMATION

<b>Inhalation:</b>	Mono St. Astier can cause the irritation of the respiratory track and inflammation of nasal mucous membranes. In extreme cases the erosion of mucous membranes is possible
<b>Ingestion:</b>	In cases of significant ingestion Mono St. Astier is caustic for the digestive tract. It can cause burning of the mouth, esophagus and stomach.
<b>Skin contact:</b>	Due to its alcalinity in solution, Mono St. Astier can irritate the skin. A prolonged contact with Mono St. Astier could cause burning of the skin.
<b>Contact with the eyes:</b>	Mono St. Astier can cause irritation and severe lesion of the pupil. Prolongued washing and ophtalmologic consultation are recommended
<b>Chronic hands, skin disorders:</b>	Prolongued exposure without adequate protection (gloves) can cause dermatitis
<b>Cancer risks:</b>	Not found
<b>Genotoxicity:</b>	Not found

## ECOLOGICAL INFORMATION

<b>Mobility:</b>	None
<b>Potential bio-accumulation:</b>	None
<b>Ecotoxicity:</b>	In case of accidental dispersion in waters, the Mono St. Astier powder could moderately increase the water pH.

## DISPOSAL INFORMATION

After hardening, as a mortar waste, Mono St. Astier can be disposed of together with other construction site waste and stockpiled in discharge sites following the regulations valid at the time of disposal.

## TRANSPORT INFORMATION

Classified as non hazardous merchandise in accordance with transport regulations..

## COMPULSORY INFORMATION

<b>Danger symbol:</b>	<b>X<sub>i</sub> irritant</b>
<b>Principal components:</b>	Calcareous sand, NHL lime and cement
<b>Phrases R:</b>	R36/37/38 irritant for the eyes, respiratory tracks and skin. R41 risks of severe eyes lesion.
<b>Phrases S:</b>	S2 keep away from childrens' reach S24/25 avoid contact with skin and eyes S26 in case of contact with the eyes wash immediately and abundantly with clean water and consult a specialist S37 wear adequate gloves
<b>Professional illnesses:</b>	Social security code : not applicable
<b>Special medical surveillance:</b>	Not envisaged

**OTHER INFORMATION: None**

*The recommendations in this document are based on our knowledge as it stands today related to Natural Hydraulic Limes, sands and additives. They are given in good faith.*

**Under no circumstance the information can be considered as a quality guarantee.**

**The User attention is drawn to the eventual risks caused by the utilisation of a product for different purposes from the ones for which the product has been envisaged. It is the responsibility of the User to adopt the appropriate safety measures and to apply all regulations current at the time of use. The prescriptions contained in this document are given to help the User to fulfill its obligations. The precautions listed cannot be considered as exhaustive.**
