

St Astier Project References (UK and Ireland)

Since the establishment of the St. Astier network in late 1997 in UK and Ireland tens of thousands of tons of NHL mortars have been used in all kinds of buildings from some of the most important historical monuments to new build and vernacular buildings.

This list is by no means complete and shows only some of the more notable sites where St. Astier limes have been supplied and used for a variety of purposes.

Mainland UK Projects using St Astier NHL:
